Drawing and Sculpture & Construction

Drawing

(Special Education)

This class is a great way to express yourself! Drawing builds hand to eye coordination, develops the mind's ability to see the objects around you, enhances creativity, and social abilities. Each week we will be working on projects in a variety of drawing mediums including pastels, conté crayon, graphite, and chalk. Every student will be assessed and tutored depending on their skill level. **A $15 supply fee due to the instructor the first day of class.**

Sculpture & Construction

(Special Education)

Students will be taking art beyond the easel by trying projects using a broader variety of media and tools. Practicing art allows the brain to develop neural pathways between short term and long term memory and promotes creative open thinking. All our projects will be hands-on and include mediums such as paper mache, plaster, and sculpture. **A $15 supply fee due to the instructor the first day of class.**
