

Median Opening Paving Inspection Checklist
General Design Standard
Section 2, 10, 11, P4 (1-3), P-19 Standard Design

- Location and alignment with drive approaches in accordance with approved plans
- Line locates
- Excavation
- Reinforcing (steel)
- Pavement and pavers
- Pavement thickness per plans
- Jointing (sawing and sealing)
- Traffic signal boxes
- Width of median nose
- Testing (all tests meet or exceed minimum specified)
- Quality of workmanship and materials
- Traffic control shall be required, per TxMUTCD
- Prior to saw-cutting, relocate all franchise utilities and city utilities, including loop detectors and signal wiring
- Align median nose to accommodate crosswalk (reference GDS p-22)
- Left turn bay shall be provided with median opening (best engineering practice)
- Core pavement per GDS to verify thickness
