JOB TITLE: Senior IS Field Technician
 DEPARTMENT/DIVISION: Information Systems
 REPORTS TO: Support Services Manager

SUMMARY: Responsible for coordinating troubleshooting and diagnostic efforts of the City’s technical and applications issues and problems that may occur. Responsible for overseeing repair, replacement, installation, moves, and changes to technology resources. Responsible for ensuring city systems are appropriately updated, configured, and interoperable while providing guidance to Field and Desktop service staff. Responds to various locations to troubleshoot and resolve end-user issues.

ESSENTIAL JOB FUNCTIONS:

- May serve as a lead to lower level staff, which includes prioritizing and assigning work; training staff on work methods and procedures; and/or, performing other related activities.
- Keep management abreast of systems operational status and activities through periodic verbal and written status reports.
- Coordinate with customers and Department management in a methodical and professional manner to gather business requirements to enhance existing City systems.
- Provide technical leadership for establishing the best possible options for designing and deriving the best solutions based on sound analytical judgment, team input and the customers’ best interest.
- Participates in the management of ongoing projects through business meetings, briefings with Department management, and document creation, maintenance, and preparation.
- Troubleshoot and resolve IT issues via phone, web, and in-person channels.
- Report on health of incidents using uptime and ticket-related performance metrics.
- Analyze trends in uptime deficiencies and trouble tickets.
- Partner with IT and business personnel to discuss the impact of incidents on products and services.
- Coordinate imaging of new computers per replacement schedule.
- Oversee deployment of new computers per replacement schedule and ensure full functionality of software and hardware during deployment.
- Oversee implementation of best practices within Support Services to improve efficiency and technology.
- Communicate highly technical information to both technical and non-technical personnel.
- Coordinate incident response within the Incident Management System and follow-up to ensure satisfactory and timely resolution of incident.
- Assist Support Services technicians/operators as needed when appropriate and utilize Incident and Asset Management System in order to assist in the evaluation of a call.

- Coordinate and provide guidance with network services, application support, and other applicable groups when needed.
- Build and maintain strong, effective working relationships with internal support teams, peers, vendors and customers as it deals with the City's technical infrastructure.
- Maintain compliance with external regulatory controls, such as the Texas Department of Information Resources.
- Responsible for assisting in the training of City staff and contract staff security protocols, risks, and proper habits, including; online learning management, in persons training events, reviewing work accuracy, providing feedback, identifying skill gaps and implementing any necessary skill development or corrective action plans to mitigate gaps.
- Participates in a variety of special projects in support of departmental operations, which may include: analyzing vendor contracts; performing special studies; providing guidance and recommendations to departments to ensure organizational sustainability and maximize organizational efficiency, effectiveness, and performance; recommending cost-conscious decisions and actions; and/or, performing other related activities.
- Performs other duties as assigned, which may involve irregular work hours, including evenings and weekends.
