The City of Carrollton supports a recycling program. Recycled materials are acceptable and will be considered for award. The City desires to use recycled products when a comparable material/product is available. If your company distributes products made of recycled materials, please submit an alternate request for proposal for the items requested. All recycled products should meet the minimum standards established in the request for proposal specifications provided. State any exceptions: costs, warranties and percentage of recycle materials used in the manufacture of the material/product. The City will determine the acceptability of the materials/product request for proposal as an alternate.

The City will consider special vendor pricing on discounts in exchange for City's willingness to participate in new product testing or promotion including ability of vendor to bring other potential customers to city job sites to demonstrate product. The amount of product discount in exchange for these services should be clearly stated in the request for proposal document. Any promotional strategies should be discussed with the Purchasing Manager and approved by the appropriate City Official(s) before submission of the request for proposal.

Successful proposer(s) agrees to extend prices to all entities that have entered into or will enter into joint purchasing inter-local cooperation agreements with the City of Carrollton. However, the City reserves the right to waive any irregularities and to make the award in the best interests of the City.

The City reserves the right to reject any or all request for proposals, and all request for proposals submitted are subject to this reservation. Request for proposals may be rejected, among other reasons, for any of the following specific reasons:

- Request for proposals received after the time limit for receiving request for proposals as stated in the advertisement.
- Proposal containing any irregularities.
- Unbalanced value of any items.
- Reason for believing collusion exists among the Proposers.
- Reasonable grounds for believing that any Proposer is interested in more than one Proposal for the work contemplated.
- The Proposer being interested in any litigation against the City.
- The Proposer being in arrears on any existing contract or having defaulted on a previous contract.
- Lack of competency as revealed by a financial statement, experience and equipment, questionnaires, etc.
- Uncompleted work, which in the judgment of the City will prevent or hinder the prompt completion of additional work if awarded.

1.19 REQUEST FOR NON-CONSIDERATION

Request for proposals deposited with the City cannot be withdrawn prior to the time set for opening request for proposals. Request for non-consideration of request for proposals must be made in writing to the Purchasing Manager and received by the City prior to the time set for opening request for proposals. After other request for proposals are opened and publicly read, the Proposal for which non-consideration is properly requested may be returned unopened. The Proposal may not be withdrawn after the request for proposals have been opened, and the Proposer, in submitting the same, warrants and guarantees that this request for proposal has been carefully reviewed and checked, that it is in all things true and accurate and free of mistakes, and that such request for proposal will not and cannot be withdrawn because of any mistake committed by the Proposer.

1.20 SALES TAX

The total for each request for proposal submitted must include any applicable taxes. Although the City is exempt from most City, State, or Federal taxes, this is not true in all cases. It is suggested that taxes, if any, be separately identified, itemized, and stated on each request for proposal. The City cannot determine for the proposer whether or not the request for proposal is taxable to the City. The proposer through the proposer's attorney or tax consultant must make such determination. Bills submitted for taxes after the request for proposals are awarded will not be honored.

PART II
INSTRUCTIONS TO BIDDERS

INSTRUCTIONS TO BIDDERS

All blanks on the Bid Form must be completed and all subtotal and total prices must be stated in both script and figures where indicated. The Owner reserves the right to reject any or all bids and to waive formalities. In case of ambiguity or lack of clearness in stating the price in the bids the Owner reserves the right to consider the most advantageous construction thereof, or to reject the bid. Unreasonable or unbalanced unit price will be considered sufficient cause of rejection of any bid or bids.

Bidders shall have performed similar scope of work within the past three years. Bidders are expected to inspect the site of the work and to inform themselves regarding local conditions and conditions under which the work is to be done. Attention is called to the provisions of the Acts of the 43rd Legislature of the State of Texas and subsequent amendments concerning the wage scale and payment of prevailing wages specified. Prevailing wage rate will be established by the City of Carrollton for this project. All bidders must comply with the rules and regulations for the Americans with Disabilities Act of 1990.

CONDITIONS OF SITE AND WORK

Bidders should carefully examine the Specification and other documents, visit the site of the work, and fully inform themselves as to all conditions and matters which can in any way affect the work or costs thereof. Should a Bidder find discrepancies in, or omissions from the drawings, specifications or other Contract Documents, or should Bidder be in doubt as to the meaning and intent, Bidder should notify the city at once and obtain clarification prior to submitting a bid. The submission of a bid by Bidder shall be conclusive evidence that the Bidder is fully acquainted and satisfied as to the character, quality and quantity of work to be performed and materials to be furnished.

SPECIFICATIONS FOR COLLECTOR STREET PANEL REPLACEMENT

It is the intent of these specifications to describe the types of repairs that may be required during the term of this agreement. Method of payment shall be based on bidder's proposed unit price in accordance with the stated measure for each item. For any bid item which includes the words "replacement of" or "remove and replace", the bid price shall include removal and disposition of the existing item. All mechanically placed concrete for street and drive approach repair shall be 4000 psi compressive strength concrete at 28 days. All hand placed concrete for street and drive approach repair shall be 4500 psi compressive strength concrete at 28 days. Concrete for sidewalk repair and construction of barrier free ramps shall be 3000 psi compressive strength concrete at 28 days. The bid price shall include all necessary traffic control, reinforcing steel, base preparation, material testing, surveying for grade/drainage verification, joint sealing, clean up, irrigation repairs, backfilling, concrete, asphalt, all barricading, and signage. Generally, if the disturbed area outside of the paved location is kept to a minimum (less than six inches), replacement of grass or sod will not be required. If damage occurs, contractor will repair the area with like grass or sod. If the parkway is left low as a result of the street and/or sidewalk repairs, to the extent that proper drainage is not achieved, the parkway is to be leveled and like sod replaced. When additional backfill, material is necessary to level the parkway and is beyond the normally required amount of fill dirt needed, then the contractor may use pay item #18 to cover their additional costs. When sod is required, pay items #19 and #20 are to be used. All traffic control must be in accordance with the details and provisions of the latest version of the TxDOT "Manual on Uniform Traffic Control Devices". All work shall be performed in accordance with City of Carrollton Public Works General Design Standard Specifications and Detail sheets.

STORM WATER POLLUTION PREVENTATIVE MEASURES

The contractor will be responsible to follow Best Management practices for storm water pollution prevention. This will include inlet protection in their construction (see D-7 of the General Design Standards). During saw cutting the contractor shall ensure the concrete slurry does not run down the street and into the storm water system. The slurry must be contained within the immediate area of the saw cutting and then removed.

STREET REPAIRS – GENERAL INFORMATION

Generally, all existing pavements will be reinforced concrete and shall be replaced with reinforced concrete. The repair shall be "doweled into" the remaining pavement with "deformed" half inch (#4) bars on 18 inch centers.

The replacement of concrete within the street, alley or sidewalk will include the following: Sawing and removal of adjacent damaged concrete to provide squared and vertical sides, compacting and leveling of fill material, surveying as necessary to verify proper grading and ensure positive drainage, replacement of like sod, barricades and lights necessary to maintain safety in and around work areas prior to, and during placement of concrete. Barricades will remain in place during curing of concrete. All reinforcing steel and other material necessary to ensure quality and maintain strength equivalent to adjacent concrete shall be furnished by the Contractor. Inlet throats may also be required to be repaired, which will be included in the unit price of the paving for that area.

For preparation of the base, removal of 6" of existing fill material is required and will be replaced with 6" of compacted flex base material, to be paid with pay item #5.

All concrete pavement repairs shall be sprayed and uniformly and completely coated with a liquid membrane-curing compound (white in color) meeting the described specifications for "Membrane Curing" in the latest

issue of the “Texas Dept. of Transportation Standard Specification for Construction of Highways, Streets and Bridges”.

All construction, contraction and expansion joints shall be sealed with a hot poured rubber joint sealing compound that complies with A.S.T.M. D 3405, AASHTO M 301 and Federal SS-S-1401, prior to the pavement being opened to traffic.

Minimum Thickness of Concrete Pavement (with flexbase):

Alleys	6 inches	Residential	6 inches
Residential Collector (C2U)	7 inches	Local Industrial	8 inches
Major Collector (C4U)	8 inches	Minor Arterial (A4D)	8 inches
Major Arterial (A6D)	8 inches	Major Arterial (A8D)	8 inches

Testing: All testing associated with pavement improvements will be conducted by a certified laboratory selected by the contractor and approved by the Public Works Department. The contractor will pay for all tests to be performed.

Subgrade compaction shall be tested for density and moisture following standard test procedures. Density testing shall be performed on each lift of properly placed and compacted material. Minimum requirements for density shall be ninety-five (95) percent of the maximum density as determined by ASTM D698. Moisture content of the material shall be from optimum moisture content. Retesting of materials shall be performed at the original test locations at the contractor’s expense, as shall additionally testing, to assure specifications compliance.

During the progress of the work, the contractor shall cast test cylinders to maintain a check on the compressive strength of the concrete being placed. Sampling and molding of test specimens shall meet the applicable A.S.T.M. guidelines. Concrete pavement testing shall require three (3) individual strength samples per test, at a frequency of one test per one hundred (100) cubic yards, or fraction thereof, of concrete placed per day. A copy of the test results shall be delivered to the Public Works Department and shall include the date and time of sampling, exact location concrete was placed, truck ticket number, slump, air content, and temperature of concrete.

Cost of these items will be calculated and paid for on a square yard basis.

STREET AND ALLEY REPAIRS – Class “HES”
(High Early Strength) Concrete

For street repairs in high traffic areas, the City may request and require the concrete be replaced with concrete that attains a strength sufficient to open the street to traffic in a very short time frame. The concrete, the concrete testing, the opening of the street to traffic, etc. will be in accordance with Item 361 and the TxDOT Standard Specifications, except as modified herein.

The repaired area may be opened to traffic when the concrete has attained a flexural strength of 255 psi. Since attaining high early strength is very dependent upon temperature, when the ambient daytime high is 80 degrees Fahrenheit or higher, the required strength is expected to be met in 6 hours or less. For above 80 degrees Fahrenheit, the contractor’s testing firm shall make 4 beams and 4 cylinders to be tested at 6 hours, 12 hours, 24 hours and 7 days. For below 80 degrees Fahrenheit, three beams and three cylinders will be made and tested at 12 hours, 24 hours and 7 days. For below 80 degrees Fahrenheit, the pavement should reach 255 psi (flexural) in 12 hours or less.

Since the main purpose of paying extra for the higher early strength concrete is to decrease the time delays to the traveling public, the contractor shall make arrangements to remove the signs and barricading as soon as the

lab notifies the City or the Contractor that the proper strength has been attained. If the repaired concrete is placed before 10:00 a.m., the street shall be opened before 5:00 p.m. If the repaired concrete is placed after 10:00 a.m., the street shall be opened before 7:00 a.m. the following day. If the required flexural strength is not met, especially the 255 psi flexural in 12 hours and the 425 flexural in 24 hours, the Contractor shall have core samples (minimum of two) taken and tested. If the tested cores don't meet the 425 psi flexural and/or if hairline cracks appear in the repaired area, the repaired concrete shall be removed and replaced at the expense of the Contractor.

Cost of these items will be calculated and paid for on a square yard basis.

INSTALLATION OF FLEX BASE MATERIAL

This item relates to base preparation for street repairs and covers the removal and disposition of 6" of existing fill material at street and driveway repair locations and placement of 6" of compacted flex base material prior to pouring new concrete.

Cost of this item will be calculated and paid for on a cubic yard basis.

INSTALLATION OF 6" INTEGRAL CURB

This item shall cover the placement and/or replacement of the 6-inch concrete curb in conjunction with the street pavement repairs. (Refer to City of Carrollton GDS, Detail Sheet P-9)

Cost of this item will be calculated and paid for on a linear foot basis.

REMOVE AND REPLACE SIDEWALKS

This item covers the replacement of sidewalks that are deemed to be sub-standard or constitute a trip hazard. This work is performed in conjunction with adjacent street repairs being made by the contractor, so additional mobilization is not needed. The minimum thickness for sidewalk replacement shall be four inches. Cost of sidewalk replacement will include: Sawing and removal of damaged concrete, leveling and compacting soil under area to be replaced, placement and removal of forms, backfilling, and clean-up around finished job. If the sidewalk to be repaired is adjacent to a back of curb, the sidewalk shall be "doweled" into the existing street with epoxy below the flow line or bottom of curb, on an approximate 45 degree angle with #3 rebar on 18 inch centers. (Refer to City of Carrollton GDS, Detail Sheet P-17)

Cost of this item will be calculated and paid for on a square yard basis.

REMOVE AND REPLACE 6" DRIVEWAY APPROACHES

This item will provide for the repair or replacement of all or a portion of drive approaches to include reinforcing steel and fade out curb and gutter pan. (Refer to City of Carrollton GDS, Detail Sheets P-15,16)

Cost of this item will be calculated and paid for on a square yard basis.

REMOVE AND REPLACE BARRIER FREE RAMPS AT STREET CORNERS

It is understood and agreed by Contractor that Owner has independently prepared most of the Contract Documents and Contractor agrees that, notwithstanding any doctrine of law to the contrary, no presumption and/or prejudice against Owner shall be presumed against Owner (nor construed in favor of Contractor) by any court of competent jurisdiction in its interpretation of the Contract Documents.

2. LEGAL ADDRESSES:

All notices, letters, and other communications to the Contractor will be mailed or delivered to either the contractor's business address listed in the Proposal or the contractor's office in the vicinity of the work, with delivery to either of these addresses being deemed as delivery to the Contractor. The Contractor shall maintain a Safety Program with detail commensurate with the work to be performed. Such review shall not relieve the Contractor of its responsibility for safety, nor shall it be construed as limiting in any manner the Contractor's obligation to undertake any action, which may be necessary or required to establish and maintain safe working conditions at the site.

The Contractor shall maintain accurate accident and injury reports.

The Contractor shall hold regular scheduled meetings to instruct its personnel on safety practices. The Contractor shall furnish safety equipment and enforce the use of such equipment by its employees.

Final payment to the Contractor by the Owner will not be made while any such suit or claim remains unsettled.

No such material or equipment shall be used by the Contractor for any purpose other than that intended or specified, unless such use is specifically authorized by the Owner in each case.

18. GUARANTEE:

Contractor shall guarantee that all products are in accordance with the manufacture's guarantees, warranties, or Policies. Any replacement of defective material or materials will be made in accordance with such guarantee or warranty policies but, in any case, responsibility ends with the replacement of the defective part or parts, and no responsibility will be assumed for unauthorized repair or replacement of said equipment. Nor any expense will be incurred due to failure of said equipment excepting replacement of its defective part or parts by the manufacturer and in accordance with said manufacturer's policies.

"Services" include, without limitation, providing, hauling, or delivering equipment or materials, or providing labor, transportation, or other service related to a project. - (I) The contractor shall contractually require each person with whom it contracts to provide services on a project, to:
 - (1) provide coverage, based on proper reporting of classification codes and payroll amounts and filing of any coverage agreements, which meets the statutory requirements of Texas Labor Code, §401.011(44) for all of its employees providing services on the project, for the duration of the project;
 - (2) provide to the contractor, prior to that person beginning work on the project, a certificate of coverage showing that coverage is being provided for all employees of the person providing services on the project, for the duration of the project;
 - (3) provide the contractor, prior to the end of the coverage period, a new certificate of coverage showing extension of coverage, if the coverage period shown on the current certificate of certificate of coverage ends during the duration of the project;
 - (4) obtain from each other person with whom it contracts, and provide to the contractor:
 - (a) a certificate of coverage, prior to the other person beginning work on the project; and
 - (b) a new certificate of coverage showing extension of coverage, prior to the end of the coverage period, if the coverage period shown on the current certificate of coverage ends during the duration of the project.
 - (5) retain all required certificates of coverage on file for the duration of the project and for

one year thereafter.

- (6) notify the governmental entity in writing by certified mail or personal delivery, within 10 days after the person knew or should have known, of any change that materially affects the provision of coverage of any person providing services on the project: and
- (7) contractually require each person with whom it contracts, to perform as required by paragraphs (1) - (7), with the certificates of coverage to be provided to the person for whom they are providing services.
- (J) By signing this contract or providing or causing to be provided a certificate of coverage, the Contractor is representing to the governmental entity that all employees of the Contractor who will provide services on the project will be covered by workers' compensation coverage for duration of the project, that the coverage will be based on proper reporting of classification codes and payroll amounts, and that all coverage agreements will be filed with the appropriate insurance carrier or, in the case of a self-insured, with the commission's Division of Self-Insurance Regulation. Providing false or misleading information may subject the contractor to administrative penalties, criminal penalties, civil penalties, or other civil actions.
- (K) The Contractor's failure to comply with any of these provisions is a breach of contract by the Contractor which entitles the governmental entity to declare the contract void if the Contractor does not remedy the breach within ten days after receipt of notice of breach from the governmental entity.
